MARS

capacity - 420 ml

height - 220 mm

weight - 250 g

Color:

Do you want a gift to strengthen the prestigious nature of your brand?

The Mars model, through a unique combination of a semi-matte cover finished with a stylish silver closure and body in deep metallic black color, allows the user to feel special. Thanks to its large capacity, the mug allows you to enjoy your favorite drink even longer.

METEOR

capacity - 320 ml
height - 207 mm
weight - 190 g

Color:

Are you looking for a modern thermo mug that keeps the temperature even longer?

Choose Meteor, model made in vacuum insulation technology. The product is available in two elegant colors: Soft Black and Pure Silver. In addition, the body of the mug can be sprayed in any Pantone color and covered with a 3D effect print, which will strengthen your advertising message.

MOON

capacity - 420 ml

height - 202 mm

weight - 220 g

Color:

What does the taste of your favorite leaf tea or lemonade with pieces of juicy fruit and an effective promotional gift have in common? COMFORT!

Choose the Moon vacuum flask, which by keeping the temperature even longer and having a functional strainer, allows user to uncompromisingly enjoy their favorite drink. Stylish cap in „Soft Touch“ version with a functional strap finished with a tasteful clip, will emphasize the prestigious character of the brand.

ORION

capacity - 440 ml
height - 222 mm
weight - 240 g

Color:

Do you expect an effective promotional gift?

Thanks to vacuum insulation and easy „1-click“ opening, Orion gives the user joy and comfort of drinking at the highest level. In terms of marketing, you have the opportunity to prepare an effective advertising message by taking advantage of the Galaxy Color decoration, which allows to wrap the body of the mug with any Pantone color.

VEGA

capacity - 310 ml

height - 180 mm

weight - 220 g

Color:

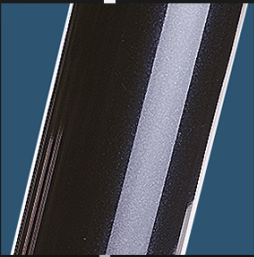

Imagine comfort of drinking without compromise.

By choosing Vega thermo mug you are guaranteed high ergonomics and comfort resulting from the use of vacuum insulation, hygienic and extremely comfortable mouthpiece made of a safe and odorless material, convenient „1-click“ opening and a lid with „Keep Open“ positioning. The model is available in attractive Soft Black color version.

BASE OF ADVANTAGES

Comfort of use

The double-walled construction of the body made in vacuum technology maintains the temperature and protects the user's hands. A comfortable mouthpiece, a cap with the "Keep Open" lock function - keeping the lid in a comfortable position while drinking, and easy 1-click opening (Orion and Vega) give the user joy and convenience of drinking at the highest level.

Safety and leak proof

You don't have to worry anymore about accidentally spilling your drink. GALAXY products have a convenient closure that protects them against opening and liquid spillage. Mugs available in two handy versions of the closure lock.

Easiness of hygiene maintenance

The hygienic mouthpiece and sealing elements made of safe and odorless plastic allow easy cleaning and maintaining purity of the product.

BASE OF ADVANTAGES

Marketing effectiveness

Now it's even easier to create an effective advertising message. Endless possibilities of GALAXY Color decoration allow you to wrap the body of selected models with any Pantone color, and the innovative Galaxy Digital 360 print with the 3D option will help you get the WOW effect.

Exclusive packaging included

All products from the Galaxy collection have an elegant, black packaging, which emphasizes the value of the product and enhances the joy of receiving. There is also a possibility to produce the packaging with an individual print, which will give the gift a consistent character.

ENSURES TEMPERATURE MAINTENANCE

HOW LONG CAN A VACUUM
FLASK WITH CUP RETAIN HEAT?

TIME	TEMPERATURE
0 H	≈ 90 °C
0.5 H	≈ 83 °C
1 H	≈ 80 °C
2 H	≈ 75 °C
5 H	≈ 65 °C
8 H	≈ 56 °C
10 H	≈ 50 °C
13 H	≈ 44 °C
15 H	≈ 35 °C
20 H	≈ 23 °C

*The temperatures listed may vary depending on the use of the vacuum flask and the ambient temperatures. Measurements have been carried out at room temperature (23 °C).

HOW LONG CAN A VACUUM FLASK AND CUP RETAIN THE COLD TEMPERATURE?

Ice placed in a vacuum flask melts
completely after about 5 hours.

*The temperatures listed may vary depending on the use of the vacuum flask and the ambient temperatures. Measurements have been carried out at room temperature (23 °C)

HOW TO USE

How to care for your galaxy cup to enjoy it for as long as possible?

We recommend hand washing of all parts of the cup

For hygiene reasons the seals can be removed and thoroughly washed, each one separately

While using the cup the inner walls may be covered with drink residue. We recommend the cleaning of inside of the cup with a rough sponge or brush, so that the flavours do not mix with each other

Washing products from the Galaxy collection in the dishwasher will cause the double-wall vacuum layer to unseal.

UNIQUE DECORATIONS

DIGITAL 360

Innovative digital printing technology around the product.

Advantages of the technology:

- Photographic print quality
- Convex 3D decoration effect
- Possibility to decorate 360 degree
- Print up to 10 cm high
- The possibility of using matt and glossy colors
- Easily combined with other technologies
- Short production time

GALAXY 3D

Feel the difference between an ordinary Digital 360 print and the 3D printing technology.

- The exceptional effect will emphasise the advertising message of your brand
- Give you a unique feeling when using the mug.
- The marking method reaches up to 10 cm in height and is available from as little as 12 pieces.

GALAXYcolor

Coloring of the outer body of the product in any Pantone color.

Advantages of the technology:

- Possibility of obtaining any Pantone color
- Glossy, matte, metallic and Soft Touch colors of surface
- Easily combined with GALAXY Digital 360 print and laser engraving.

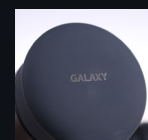

LASER engraver

Laser engraving is carried out on metal and plastic components.

Advantages of the technology:

- Subtle, monochrome decorative effect
- Order processing from 12 pcs.
- Low decoration costs
- Possibility of personalization on the cap of the mug and vacuum flask
- High accuracy of mapping small elements (minimum line thickness 0.1 mm).
